Vit W. Miska
Primary Examiner

The following is an examiner's statement of reasons for allowance:

Claims 1-16 are allowed because the prior art does not disclose or suggest a buffer comprising a current source or generator providing a signal or current bias substantially independent of temperature variation, a decoupler or means for providing a load signal in response to the current signal that is substantially independent of noise present in a power supply signal, and means or differential transistor pair receiving the load signal for producing an output signal substantially independent of noise in the first power signal and temperature variations or for conducting the load signal to a load circuit which includes a cross coupled circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vit W. Miska whose telephone number is 571-272-2108. The examiner can normally be reached on M-F 9-5:30.
